

1. Name 5 IT job roles and write one line about what each role does.

IT Job Role	Work Done
Software Developer	Designs, develops, and maintains software applications.
Web Developer	Creates and maintains websites and web applications.
Software Tester (QA Engineer)	Tests software to find and report bugs.
Database Administrator (DBA)	Manages and secures databases and their performance.
Network Administrator	Maintains computer networks and ensures smooth connectivity.

2. List 3 product companies and 3 service companies with one example of work each does.

Product Companies

Company Example of Work

Microsoft Develops the Windows operating system.

Google Develops Android and Google Search.

Adobe Develops Photoshop and Acrobat software.

Service Companies

Company Example of Work

Tata Consultancy Services Provides software development and IT consulting services.

Infosys Offers business and technology consulting services.

Wipro Provides IT support and digital transformation services.

3. Write the full forms and one-line use of: GitHub, Slack, Jira, IDE, API.

Term	Full Form	Use
GitHub	Git + Hub (Git Repository Hosting Platform)	Used for storing and managing source code.
Slack	Searchable Log of All Communication and Knowledge	Used for team communication and collaboration.
Jira	Gojira (Product name, not an official acronym)	Used for project and issue tracking.
IDE	Integrated Development Environment	Used to write, edit, and debug code.
API	Application Programming Interface	Allows different software applications to communicate with each other.

4. Name any 5 programming languages and mention one popular use case for each.

Programming Language Popular Use Case

Python	Artificial Intelligence and Machine Learning
Java	Android Application Development
C++	Game Development
JavaScript	Interactive Web Development
PHP	Server-side Web Development

5. What is the difference between a developer and a tester? (2 lines)

A **developer** creates and maintains software by writing code and implementing features.

A **tester** checks the software for bugs, errors, and quality issues to ensure it works correctly.
